A responsible, self-motivated, and active student of the IT department at TUKE is looking for first back-end development role. I'm passionate about new technologies, social media, and image processing. I'm a quick learner, a strong team player, and always ready to tackle new challenges.

WORK EXPERIENCE

Manager of the 3-member team start-up   April 2024 - Present

S&S Creation

- Led the development and launch of innovative digital solutions
- Co-led the development of an innovative "Magic Mirror" with integrated AI and camera technology, aimed at detecting potential health issues in real-time.
- Presented the project at university tech expos, receiving positive feedback and interest from industry professionals.

Full Stack Developer   April 2024 - Present

S&S Creation

- **Node.js**: Developed and maintained the server-side logic, ensuring efficient data processing and communication between the AI models and the front-end interface.
- **Full-Stack Development**: Designed and built both front-end and back-end components, creating a seamless user experience and robust data management system.

Projects

- ➢ **Creating a simple Tic-Tac-Toe game in Java**
- ➢ **Creating a "To-Do List" program in Python using the Tkinter library for the graphical interface.**
- ➢ **Developing a web page for my YT channel using React, HTML, Tailwind CSS**
